## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Group I, claims 1-2, species pain in Paper filed December 3, 2003 is acknowledged. The traversal is on the ground(s) that Groups are a single invention because the groups are drawn to treatment of pain. This is not found persuasive because the claims lack the same or corresponding special technical features because the method of claim 1 is anticipated by WILLIAM (US 5,731,284A (WILLIAM) 24 March 1998) and thus, does not share a special technical feature with any other group.

The requirement is still deemed proper and is therefore made FINAL.

2. Newly submitted claims 32-33 and 37-39 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons.

Group VII, claims 37-39, drawn to a method of administering GDNF in combination with a second agent.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Groups I and VI – pain or hyperexcitability phenomena.

Groups II-IV– pain, paraesthesia, or hyperexcitability phenomena.

Group III – GDNF or NGF.

Claims 32 and 33 contain multiple species from which claim 32 was the elected species. All other species have been withdrawn as it relates to the lack of unity from the originally presented claims.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits.

Accordingly, claim 32-33 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 20-31, 34-36 and 40-44 are rejected under 35 U.S.C. 102(e) as being anticipated by Williams (US 5,731,284).

WILLIAMS teach a method of administering GDNF in an amount effective to treat neural injury (columns 16-28). The GDNF administration inherently affect the sodium channel current flow.

4. No claims are allowed.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Pak whose telephone number is 571-272-0879. The examiner can normally be reached on 8:30 am - 2:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler can be reached on 571-272-0871.
